

RODRIGO DE CAMPOS

Senior Linux / DevOps Engineer

Email: sprc86@gmail.com | Location: Joinville, Brazil | Citizenship: Brazilian and German

LinkedIn: <https://www.linkedin.com/in/sprc86/>

PROFESSIONAL SUMMARY

Senior Linux / DevOps Engineer with over 10 years of professional experience designing, automating, operating, and troubleshooting Linux-based infrastructure. Strong background in Linux systems administration, Bash automation, configuration management, Infrastructure as Code, cloud platforms, CI/CD pipelines, monitoring, virtualization, VPNs, backups, and production operations.

Linux professional since 2011 and full-time Linux user since 2004. Experienced with AWS, Terraform, Ansible, SaltStack, Puppet, Chef, Docker, Kubernetes, Jenkins, KVM/QEMU, Prometheus, Grafana, Zabbix, Nagios, OpenVPN, SQL databases, and Linux networking. International professional experience across Brazil, Germany, and the United Kingdom.

CORE SKILLS

Linux Systems: Debian, Ubuntu, Red Hat Enterprise Linux, CentOS, systemd, shell scripting, package management, users and permissions, filesystems, storage, troubleshooting, performance analysis, backup routines, log analysis, production support.

DevOps and Automation: Ansible, SaltStack, Puppet, Chef, Bash, Python, Terraform, Infrastructure as Code, configuration management, infrastructure provisioning, repeatable deployments, environment standardization.

Cloud, Virtualization and Containers: AWS, KVM/QEMU, Docker, Kubernetes, virtual machine management, cloud migration, co-location to cloud migration, infrastructure optimization.

CI/CD and Observability: Jenkins, CI/CD pipelines, custom Docker images, deployment automation, Prometheus, Grafana, Alertmanager, Telegram bot integration for alerts, Zabbix, Nagios.

Networking, Security and Databases: TCP/IP, DNS, VPNs, OpenVPN, firewalls, Linux network troubleshooting, backup security, access management, infrastructure hardening, SQL, MySQL, PostgreSQL.

PROFESSIONAL EXPERIENCE

Independent Linux / DevOps Projects

October 2019 - Present

- Designed and deployed a multi-site VPN solution using OpenVPN for five geographically distributed sites, including automated backups and real-time monitoring.
- Automated infrastructure provisioning using Terraform and Ansible in AWS environments.
- Built and maintained deployment workflows using Jenkins and Docker.
- Worked on Linux server automation, backup routines, monitoring, and infrastructure reliability.

Clevertex - DevOps Linux Engineer

August 2020 - August 2022

- Engineered custom Docker images and supported containerized workloads for AWS-based infrastructure.
- Developed Linux shell scripts to automate operational tasks and reduce repetitive manual work.
- Implemented and maintained Jenkins-based CI/CD pipelines.
- Introduced and managed cloud infrastructure with Terraform, reducing infrastructure setup time by approximately 25%.
- Supported Linux production environments, troubleshooting infrastructure, deployment, and automation issues.

Softexpert - DevOps / Cloud Infrastructure Engineer

August 2019 - October 2019

- Helped build an SRE/DevOps culture by introducing automation, infrastructure standardization, and deployment improvements.
- Implemented automation stacks from scratch using Ansible.
- Reduced deployment bottlenecks through infrastructure automation and repeatable provisioning.
- Led the introduction of Terraform and AWS infrastructure automation across multiple projects.

SELECTED EARLIER LINUX / UNIX INFRASTRUCTURE EXPERIENCE

Gamevy / Glück Games - DevOps Linux Administrator | September 2018 - February 2019

- Managed Linux systems for gaming infrastructure, built and supported an OpenStack-based cloud environment, migrated from co-location to cloud infrastructure, and automated tasks with SaltStack and Ansible.

AQL - DevOps / Linux Systems Administrator | June 2018 - September 2018

- Solved Linux infrastructure issues related to monitoring, automation, and documentation, expanding configuration management automation with SaltStack.

Goodgame Studios - Linux Systems Administrator | July 2016 - June 2017

- Administered Linux systems in a large-scale gaming infrastructure environment and migrated storage pools in a production KVM hypervisor environment with minimal downtime.

Humantech Knowledge Management - Linux Systems Administrator | September 2014 - February 2015

- Planned and deployed configuration management using SaltStack on AWS Red Hat servers, improving configuration control and reducing operational risk.

noris network AG - Linux Systems Administrator | February 2014 - April 2014

- Managed Unix/Linux services, created user accounts, resolved internal infrastructure tickets, and automated administrative tasks.

Netzmarkt GmbH - Linux Systems Administrator | October 2013 - November 2013

- Migrated configuration management from Puppet to Chef and developed custom Ruby scripts for configuration and deployment tasks.

Jagex Games Studio - Linux Systems Administrator | December 2012 - October 2013

- Deployed new game versions, managed Hadoop nodes, and automated Linux system configuration using Bash and bcfg2.

Federal University of Santa Catarina - IT Technician | June 2012 - December 2012

- Built file servers and implemented backup solutions using Bash scripting, improving data availability and reliability.

Santa Catarina State Department of Health - IT Technician | January 2012 - May 2012

- Built a Debian file server with automated backup scripts, improving file storage efficiency and data protection.

HSBC Global Technology Brazil - Unix Application Support Analyst | April 2011 - December 2011

- Provided Unix application support, debugged application and system logs, and automated support tasks using Bash scripting and SQL.

EDUCATION

Bachelor's Degree in Computer Science - in progress | Uninter, 2024-2028

Postgraduate Specialization in Information Security | SENAC, 2024 | 360 hours

Technology Degree in Computer Networks | SENAI, 2010

CERTIFICATIONS

LPIC-2: Linux Engineer - Linux Professional Institute

LPIC-1: Linux Administrator - Linux Professional Institute

EF SET English Certificate - C2 Proficient, 77/100

LANGUAGES

Portuguese: Native | English: C2 Proficient | German: A2/B1

ADDITIONAL INFORMATION

Brazilian and German citizenship. International work experience in Brazil, Germany, and the United Kingdom. Strong Linux background since 2004. Professional focus on Linux infrastructure, DevOps automation, cloud platforms, virtualization, monitoring, and production operations.
